## SIEMENS PANELS

15 or 21-inch TFT or Full HD displays, with high resolution and detailed interface for monitoring and control.

Extensive customization options for visualizations and control layouts, ideal for users who need a high degree of personalization.

Seamless integration with Siemens PLCs, drives, and other devices. This user-friendly software platform enhances engineering efficiency and reduces development time.

High ingress protection (IP65 or higher), ensuring durability in industrial environments that may be dusty or wet.

Immediate technical support, fast delivery times.

Resistive touch or multi-touch gestures, such as pinch-to-zoom, swipe, and rotate, providing intuitive, tablet-like control.
